

Sam Liu

Java | Spring Boot | React | AWS | Kubernetes | Terraform | CI/CD

Sydney, NSW | +61 401 560 851 | liushanzheng960522@outlook.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Cloud-focused full stack software engineer with 8+ years of software engineering experience, including enterprise full stack and cloud engineering roles across Australia and earlier international experience. Strong hands-on background across **Java/Spring Boot, React/Angular, AWS, Terraform, Kubernetes, Helm**, and **GitHub Actions**, with proven impact in deployment acceleration, platform migration, image optimization, and engineering process standardization. Comfortable working across product, platform, and delivery teams in agile environments.

CORE SKILLS

Backend	Java 8/17, Spring Boot, Spring WebFlux, Spring Security, Spring MVC, Spring Data JPA, Hibernate, Laravel, REST APIs
Frontend	TypeScript, JavaScript, React, Angular, Vue, Next.js, AG Grid, Tailwind CSS, Material UI, Ant Design
Cloud & DevOps	AWS, GCP, Terraform, Docker, Kubernetes, Helm, Kustomize, Jenkins, GitHub Actions, GitOps, Cloud Build
Data & Search	PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Elasticsearch, OpenSearch, Firestore
Practices	Micro frontends, CI/CD, infrastructure as code, developer environments, environment isolation, MCP services, feature flag platforms, platform migration, observability, agile delivery, mentoring

EXPERIENCE

ResMed Inc. | Cloud Software Engineer (Full Stack)

July 2022 - Present

- Maintained and enhanced **AirView Web**, a large-scale enterprise healthcare platform, improving reliability while continuing to deliver new product features.
- Contributed to the next-generation application architecture using **micro frontends**, building scalable user interfaces with **Angular** and **React**.
- Led development of an experience service API using **Java 17, Spring Boot 3.2, Spring WebFlux**, and **Spring Security**, supporting secure integration between frontend applications and backend services.
- Managed and evolved **AWS** infrastructure with **Terraform**, supporting repeatable and secure cloud deployments.
- Designed and maintained CI/CD workflows using **Jenkins** and **GitHub Actions**, improving deployment speed by **500%**.
- Designed and implemented isolated developer deployment environments, enabling engineers to provision shared test instances and validate changes independently without impacting mainline or production-like environments.
- Developed a shared **LaunchDarkly MCP service** to centralize feature-flag access for internal teams and automation workflows, reducing duplicate subscription usage and lowering SaaS costs.
- Optimized CI/CD pipeline execution through workflow redesign, caching, and parallelization, reducing end-to-end build and deployment time by **50%+**.
- Built Kubernetes release pipelines using **Helm** and **Kustomize**, improving consistency across application environments.
- Drove migration from **Bitbucket** to **GitHub** and supported the transition from Jenkins-based delivery to **GitOps** workflows.
- Optimized frontend and backend build artifacts, including a **10x reduction in container image size**.
- Standardized development and release practices across multiple teams, led knowledge-sharing sessions, mentored engineers, and served as a rotating Scrum Master.

Vnet Solutions Pty Ltd | Java Developer

August 2021 - July 2022

- Built and maintained a full stack inventory management system using **Java 8, Spring Boot, Hibernate/Spring Data JPA, Quartz, Redis, Spring Batch**, and **Apache POI**.
- Developed frontend features with **Angular** and **AG Grid**, improving operational data entry and reporting workflows.
- Supported production and UAT deployments, provided Level 3 technical support, and resolved application issues across backend, frontend, and database layers.

Articulate Pty Ltd | Backend Developer

November 2020 - July 2021

- Developed back-office platform features including activity configuration, gift configuration, and role-based limitations using **React** and **Laravel REST APIs**.
- Led delivery of a CRM system as a full stack developer using **Vue**, **Spring Boot**, **MyBatis Plus**, **Element Admin**, and **PostgreSQL**.
- Implemented caching strategies for high-volume request paths and improved backend responsiveness.
- Built a log collection and analytics platform using **Elasticsearch**, **Logstash**, **Filebeat**, and **Kibana** to improve operational visibility.

EDUCATION & CERTIFICATIONS

Master of Information Technology

The University of Sydney
July 2019 - December 2020

- AWS Certified Solutions Architect - Professional
- Google Cloud Certified Professional Cloud Architect
- Certified Kubernetes Administrator (CKA)
- Project Management Professional (PMP)
- Microsoft Certified: Azure AI Fundamentals
