

Sam Liu

Cloud Software Engineer | Platform, DevEx & Full Stack Systems

Sydney, NSW | +61 401 560 851 | liushanzheng960522@outlook.com | LinkedIn | GitHub

Professional Summary

Software engineer with **8+ years of hands-on experience** building enterprise applications and improving developer productivity across cloud delivery platforms. Strong across **Java/Spring Boot, React/Angular, AWS, Terraform, Kubernetes, Helm, Jenkins**, and **GitHub Actions**. Recent work focuses on CI/CD acceleration, isolated developer environments, container optimization, observability, and platform migration across engineering teams.

Selected Impact

- Reduced Java build time from approximately **30 minutes to 3 minutes** through CI/CD workflow redesign, build optimization, and caching.
- Designed traffic-routed isolated deployment environments used by **100+ engineers**, removing shared test-channel waiting with branch-aware routing and fallback to main.
- Reduced frontend and backend container image sizes from approximately **2GB to 400MB**.
- Supported migration from **Bitbucket/Jenkins** delivery toward **GitHub** and **GitOps** workflows.

Core Skills

Cloud & DevOps	AWS, GCP, Terraform, Docker, Kubernetes, Helm, Kustomize, Jenkins, GitHub Actions, GitOps
Developer Experience	CI/CD optimization, isolated developer environments, internal tooling, feature flags, build caching, engineering standards
Backend & Frontend	Java 8/17, Spring Boot, WebFlux, Spring Security, REST APIs, TypeScript, React, Angular, Vue, micro frontends
Data & Observability	PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Elasticsearch, OpenSearch, Datadog, RUM/browser logging

Experience

ResMed Inc. | Cloud Software Engineer (Full Stack)

Jul 2022 - Present

- Redesigned Java CI/CD workflows across **Jenkins** and **GitHub Actions**, reducing JAR build time from approximately **30 minutes to 3 minutes**; reduced broader test/build duration by **50%+** through parallelization and targeted caching.
- Designed traffic-routed isolated developer deployment environments for **100+ engineers**, replacing shared test-channel bottlenecks with branch-aware routing and automatic fallback to the default main deployment.
- Optimized frontend and backend build artifacts, reducing container image size from approximately **2GB to 400MB**.
- Drove migration from **Bitbucket** to **GitHub** and supported the transition from Jenkins-based delivery to **GitOps** workflows.
- Built an internal **LaunchDarkly** feature-flag access service with centralized permissions, enabling shared developer access while reducing individual SaaS seat dependency.
- Managed **AWS** infrastructure with **Terraform** and supported Kubernetes deployments using **Helm** and **Kustomize**; configured **Datadog** monitors, RUM, browser logs, and APM correlation for faster issue analysis.
- Maintained and enhanced **AirView Web**, a large-scale enterprise healthcare platform used across **Europe, APAC, and the United States**; delivered backend and frontend capabilities with **Java 17, Spring Boot 3.2, WebFlux, Angular**, and **React**.
- Standardized development and release practices, led knowledge-sharing sessions, mentored engineers, and served as a rotating Scrum Master.

Vnet Solutions Pty Ltd | Java Developer*Aug 2021 - Jul 2022*

- Built and maintained a full stack inventory management system using **Java 8, Spring Boot, Hibernate/Spring Data JPA, Quartz, Redis, Spring Batch, and Apache POI**.
- Developed Angular and AG Grid features for operational data entry and reporting workflows; supported production/UAT deployments and Level 3 issue resolution across backend, frontend, and database layers.

Articulate Pty Ltd | Backend Developer*Nov 2020 - Jul 2021*

- Delivered back-office, CRM, and role-based platform capabilities using **React, Vue, Laravel REST APIs, Spring Boot, MyBatis Plus, and PostgreSQL**.
- Implemented caching for high-volume request paths and built ELK-based log collection and analytics to improve operational visibility.

Education & Certifications

Master of Information Technology | The University of Sydney | Jul 2019 - Dec 2020

- AWS Certified Solutions Architect - Professional
- Certified Kubernetes Administrator (CKA)
- Google Cloud Certified Professional Cloud Architect
- Project Management Professional (PMP)
- Microsoft Certified: Azure AI Fundamentals
